*"Vapes were running my life,
instead of me running my life." - Diara S.*

New York City Success Stories

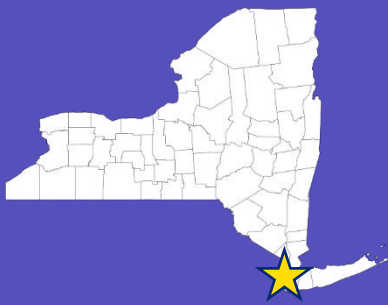

Julia B.

Diara S.

Ages 29 + 30

New York, NY

Julia B. and Diara S. both live in Manhattan and do not know each other, yet they share similar experiences. They became addicted to vape products during college but wanted to ensure they became tobacco-free before turning 30. They each received free coaching and free medications through the New York State Quitline, and have achieved better health and increased freedom for over a year and counting.

*"There was a time where I couldn't picture myself without using vapes," said Julia B.
"I feel so much healthier mentally and physically – it's like a different world."*
